

## Best by Design

Get up off your hands and knees and do edge prep work standing up with the ergonomically designed Hum-B™ edger. The Hum-B™ edge grinder is ideal for grinding or polishing concrete, terrazzo, or stone surfaces, or removing adhesives, paint or epoxy floor coatings. No matter the application, the ergonomically designed Hum-B™ edge grinder will increase productivity, reduce jobsite injuries and cover more square feet in less time with less effort.

**Standard on**  
**CDCLarue HUM-B™**  
**edge grinder**

- Eliminate fatigue and gain better control by standing in an upright position to grind.
- Equipped with the patented Dust Grabber™ dust shroud. The Dust Grabber™ shroud captures 99% of dust with no suction lock to slow you down and comes with a lifetime replacement warranty on all metal parts.
- Available in a single speed (6000 RPM) grinder or a variable speed (3000 RPM) grinder for polishing.
- Operates on a standard 110 Volt 20 amp outlet and is equipped with gas filled shocks for level grinding, 250 watt halogen light, 12 segment turbo cup grinding wheel and two five inch non-marking swivel caster wheels.

**The PB-1050 dust collection system works perfectly with the HUM-B edge grinder.**

The HUM-B edge grinder makes edging easier and the PB-1050 makes it cleaner. Powered by PULSE-BAC patented technology, the PB-1050 will maximize uptime – and profits.
